EDUCATION

University of Michigan

Bachelor of Science in Engineering, Computer Science

GPA: 3.96 / 4.00

Ann Arbor, MI

May 2028

Awards: Michigan Council of Women in Technology Scholar, Branstrom Freshman Prize, National Merit Scholar

Coursework: Web Systems, Computer Security, Introductory Data Science, Positively Leading People & Organizations

WORK EXPERIENCE

Student Life Technology Services

Ann Arbor, MI

Computer Consultant 3 (Previously: Computer Conslt. 1[Win. '26] & Computer Conslt. 2[Sum. '26]) *Jan 2025 - Present*

- Maintained and audited enterprise hardware/software assets across 80+ locations, minimizing downtime and preventing technology disruptions across 50,000+ end-users.
- Designed and researched custom JavaScript-based Google Apps Script solutions to automate IT department workflows and organize internal data, mitigating manual entry and human error across 15+ master records, maintaining data for 10,000+ devices.
- Refactored legacy codebase and optimized algorithm efficiency, improving script execution speed by 50% and enhancing system reliability across departmental data pipelines.
- Authored comprehensive developer documentation and sheet usage guides, establishing coding standards to accelerate codebase onboarding for future engineers.
- Audited legacy workflows to identify operational bottlenecks, driving technical research into automated solutions and pitching actionable roadmap proposals to senior leadership.

PROJECT EXPERIENCE

Hackathon Experience

Walled Lake & Ann Arbor, MI

Collegiate + High School Hackathon Project

May 2025 - Present

- MHacks 2025 Collegiate Participant, where I helped prototype a full-stack web app to help people better manage Type 2 diabetes, using an HTML/CSS/JavaScript frontend and a Flask (Python) backend to manage user data and provide relevant recommendations.
- Developed and pitched working software prototypes under high-pressure time constraints. Combined technical development with structured project pitches to deliver functional, high-impact solutions.
- Won 2nd place at the WLCSD District Hackathon: Created a full-stack interview preparation web application using a Node.js backend with Ollama integration, enabling real-time practice and progress tracking for active job seekers.

LEADERSHIP EXPERIENCE

Girls in Electrical Engineering & Computer Science

Ann Arbor, MI

Event Logistics Committee Member

Aug 2025 - Present

- Structured operational timelines for Fall club elections and Winter committee applications, ensuring smooth leadership transitions and consistent member recruitment.
- Organized targeted social networking events for organization members, increasing peer-to-peer engagement and fostering an inclusive community culture.
- Analyzed engagement and attendance metrics to deliver data-backed statistical assessments of GEECS events, optimizing future club decisions based on historical success.

SKILLS

Tech stack: Python, C++, React, Javascript, HTML, CSS

Certifications: IBM SkillsBuild Cyber Security, FreeCodeCamp Responsive Web Design,

CLUBS & ACTIVITIES

MSAIL, Club Member

Aug 2026 – Present

Michigan Hackers, Machine Learning & Open Source Subteams
